

**Model 71080 Series**

Class I helicopter beacon (red only), can now replace Model 70905 beacon, now available with new style mounts and electrical connections (28 & 14 VDC). EC style coming soon. See page 17.

**Model 70985 Series**

An internal LED illumination product, some variations not shown (28 VDC only). See page 28.

**Model 90541 Series**

Self-contained aft POS/ACL with Diagnostix™ and redundant patent technology (28 VDC only). See page 8.

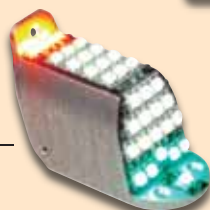

**Model 71154 Series**

Internal lighting typically for the cockpit, replaces Grimes 22020 (S76 & GIV) (28 VDC only). See page 28.

**Model 71170 Series**

All LED forward POS/ACL with integrated ground recognition feature (28 VDC only). Ref. 71234. See page 10.

**Model 71186 Series**

Universal LED illumination in a very small package, under 2" behind the lens retainer (28 VDC only). See page 34.

**Model 71230 Series**

Luminator 5200 Series LED solution for retrofit or new installation. Internal light swivels (28 VDC only). See Page 35.

**Model 71245 Series**

Single control, internal LED landing light (28 VDC only). See page 33.

**Model 71246 Series**

Single control, internal LED taxi or recognition light. Mounting orientation 90 degrees to Model 71125 with increased power (28 VDC only). See page 32.

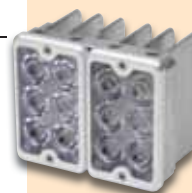

**Model 90433 Series**

Single control, 6 inch round internal, LED landing light (28 VDC only). See page 30.

**Model 71259 Series**

Dual (independent) control, LED illumination, landing, taxi & recognition light (28 VDC only). See page 33.

**Model 90520 Series**

Split LED red/white beacon, fixed wing or helicopter with multiple mounting solutions (14 & 28 VDC). See page 16.

**Model 90482 Series**

Aft POS/ACL with integrated ground recognition feature. Upgrade in size and features to Model 90354, 2008 catalog. Also reference Model 71234 (28 VDC only). See page 11.

**Model 90544 Series**

Wing tip POS/ACL with integrated redundant technology and on-board Diagnostix, (28 VDC only). See page 8.

**Model 90485 Series**

Independent control LED taxi & recognition lighting, focused segment and spreader segment as standard (28 VDC only). See page 32.

**Model 90475 Series**

Flush mounted, exterior, all LED, forward and aft POS/ACL, the smallest wing tip model Whelen manufactures. Also ref. Model 71234 (14 & 28 VDC). See page 8.

**Model 71265 Series**

Replaces the Whelen halogen light array currently in production with AgustaWestland A109 and its brighter! (28 VDC only). See page 33.

**Model 71325 Series**

LED exterior recognition light, replaces Whelen 71092 Series (2008 catalog and previous) at nearly three times the intensity. See page 34.

**Model 90406 Series**

Developed for the S76 as recognition lighting, this package has migrated to other fixed wing and helicopter designs (28 VDC only). See page 33.
