IMPORTANT: The outer surfaces of this product may be cleaned with mild soap and water. The use of any other chemicals may void product warranty. Do not use a pressure washer.

MOUNTING INSTRUCTIONS:

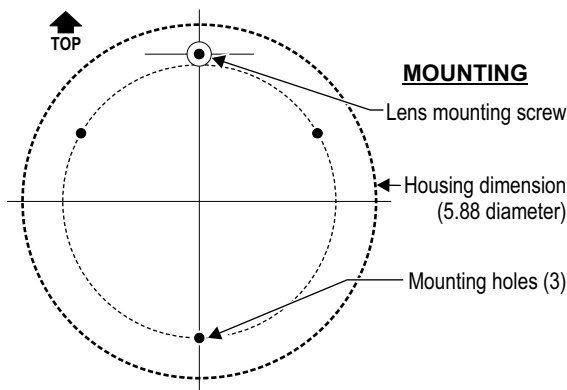

CAUTION: The strobe light power supply is a high voltage device. Do not touch or remove the strobe tube assembly while the unit is in operation. Wait at least 10 minutes after turning off power before starting any work or trouble shooting.

1. First, hold the reflector against the mounting surface and mark the 3 mounting holes off onto the mounting surface. **IMPORTANT:** Be sure the lens mounting screw is positioned at the top of the lighthead as shown.
2. Drill the 3 mounting holes using a drill bit sized for a #6 sheet metal screw.
3. Drill a hole in the approximate center of the mounting area for the power wire to pass through. **NOTE:** You should install a rubber grommet (customer supplied) to protect the wire.
4. Run the power wire through the wire hole and to your power source, then mount the lighthead as shown. Be sure the gap in the mounting gasket is on the bottom.

WARNING: All customer supplied wires that connect to the positive terminal of the battery must be sized to supply at least 125% of the maximum operating current and fused at the battery to carry the load.

SPECIFICATIONS

V ANODE (MIN)	200 V.D.C.
V ANODE (MAX)	700 V.D.C.
V TRIG (MIN)	150 V.D.C.
FLASHRATE	70 FPM (TYP)
ENERGY (MAX)	25 JOULES
POWER (MAX)	25 WATTS
