## Installation Guide: SA314 Mounting Bracket 2005 Ford Escape Hybrid

Slip the bracket (with siren attached) onto the frame. The square hole in the top of the bracket will fit over the protrusion in the frame.

### Installation:

1. Mount the siren to the mounting bracket as shown here.
2. Remove the one piece front bumper assembly from the vehicle (Fig. 1). Refer to the factory manual for the removal procedure.
3. Slip the bracket/siren onto the center of the lower frame of the vehicle. There is a square hole in the top of the bracket that fits over a small protrusion on the top of the frame (Fig. 2).
4. Secure the bracket to the frame with the supplied self tapping screws. You will need a drill equipped with a 3/8" socket to drive the screws in. Do not over tighten.
5. Replace the front bumper assembly. You will have to trim some plastic off of the bumper assembly to make the siren fit properly.
6. Extend the WHITE (positive) and BLACK (negative) speaker wires to your siren amplifier and connect as shown in the amplifiers instructions.
