Installation Guide: Aviation model: 9046000 P/N: 01-0790460-00 4-Inch Taxi Light Assembly

SPECIFICATIONS:

Nominal Operational Voltage:..... 28VDC
 Input Current (Nominal):..... 1.5 Amps

CONTINUED AIRWORTHINESS:

The Taxi Light, Model 9046000, consists of two banks of seven LEDs, for a total of 14 LEDs. If one LED fails as a short, the other 13 will continue to operate. If an LED fails open, all seven LEDs in that bank will be off and the other bank will operate normally. There is no FAR requirement for this light. Inspect the lens. Replace if there is excessive scratching, pitting, discoloration or cracking.

INSTALLATION PROCEDURES:

The following information is to assist in the installation of a Whelen LED Taxi Light.

1. The installation procedure described in the following text will be confined to a single light installation, but is identical for multiple light installations.
2. Connect the taxi light inputs according to the chart shown. Connect the power lead to an appropriately sized breaker. Connections to be in accordance with FAA approved methods.
3. Using appropriate hardware, install light assembly and insure that all leads are clear of any obstructions and ty-rap as required. Secure light assembly, using vibration resistant threaded fasteners.
4. Check all avionics systems for interference from this installation.
5. A flight check should be performed by a properly certified pilot.
6. Update aircraft records, complete Form 337 and obtain FAA field approval for installation, as necessary.

NOTE: The reflector has a keying post (1 post is longer than the other 3) and needs to be properly oriented.
