

LIBERTY **DUO**TM

SUPER-LED[®] LIGHTBARS

**WITH NEW DUO TECHNOLOGY YOU HAVE THE
CONVENIENCE OF UP TO FOUR BARS IN ONE...**

HOW WILL YOU USE IT?

**MANUFACTURED
WHELEN[®]
IN AMERICA**

PRELIMINARY

WHELEN[®] LIBERTY DUO[™]

A Super-LED[®] lightbar that's as versatile as you are!

Create 4 different lightbars using Red/Blue DUO modules

▲ Imagine the convenience of FOUR warning bars IN ONE!

Not a problem with Whelen's DUO bars!

Now you have the ability to change color sets to the Front, Back and Sides of the vehicle with the lighting YOU need, at the flip of a switch!

Whelen's top performing LFL Liberty lightbar just took another step forward with its Duo technology in any two color combination of Linear-LED[®] modules.

You can select high intensity white or warning light colors when and where you need it. Low current models offer pre-configured pattern sets with Scan-Lock pattern control. WeCan models offer fully programmable configuration and flash patterns by easy to use software.

Perfect for the busy volunteer fireman or EMS medical professional who needs a different color warning for another application. No need to have 2 separate warning devices. Just flip a switch!

- An all Linear-LED[®] lightbar featuring the next generation of ultra bright, ultra wide-angle Super-LED technology.
- Combination lighting with two warning colors of either blue, red, amber or white in a single Super-LED module for just about any color combination you need.
- Optional Duo five or six lamp Super-LED Traffic Advisor[™] lets you change your primary color warning lights to amber traffic advisor mode.
- Duo Super-LED modules provide ultra bright, wide angle, long-life performance and low current draw, in the sleek Liberty aerodynamic package.
- Uses single color LEDs while producing a full uniform look, unlike competitor products which produces dead spots or uses inefficient multi-color individual LEDs.
- Available in both WeCan[®] and low current lightbars.
- All models exceed SAE requirements.
- Five year HDP[®] Heavy-Duty Professional warranty on LEDs.
- Size: 2-1/2" (64mm) H x 12" (304mm) W x three standard lengths: 43-1/8" (109cm), 48-1/2" (123cm) or 53-7/8" (137cm).

▼ *Need a work light instead of warning lights?*

A hard working partner, perfect for the night shift!

Go from a warning light to a flood work light with Red/White and Blue/White DUO modules

- ▶ **Pre-programming the lighting configuration allows you to change from a warning light to a work light, or from one color warning to a second color, by a flip of a switch!**
- ▶ Give yourself an extra measure of safety when stopping in back of a vehicle. Keep warning lights to the rear and left side of the lightbar and light up the area where you approach a stopped vehicle.
- ▶ Incorporate a Whelen Traffic Advisor in the rear of the bar for added traffic control and lane safety.
- ▶ The possibilities are practically limitless where added light, properly directed, could make your job easier and safer!

Switch warning colors with Blue/Amber DUO modules

Switch from warning to floodlighting with White/Amber DUO modules

From Warning Lights... ▼

To Traffic Advisor... ▼

Change your light configuration with the flip of a switch, using control heads like Whelen's CenCom Gold™! ▼

Make your job easier... Make your job safer!

Choose the model and options that work for you!
