PCCS9RW Power Control

PROGRAMMABLE HIGH CURRENT SWITCHES (REPLACES PCCS9R)

High current with built-in relays for lightbars that use standard switching. Connects to most lightbars and auxiliary warning equipment without the use of separately mounted relays or relay boxes.

FEATURES

- Control 9 lightbar functions or other auxiliary equipment.
- Front panel programmable slide switch with three 20 amp relays.
- Six front panel programmable push-button momentary type switches with 20 amp relays.
- All switches can be programmed to activate any combination of the relay outputs, or any other momentary push-button switch.
- The 6 momentary switches can be easily programmed for one of four operations, push-on push-off, momentary, flashing or timed output.
- Easy reset to factory default.
- Clone one controller to another.
- Any switch can be programmed for siren activation.
- Auxiliary input slide switch, position 3.
- Momentary contact for low power, trunk lock or gun lock control.
- Long lasting solid-state green LED backlighting makes it easy to read the translucent legend buttons at night
- Active switches are easily identified in bright sunlight or at night by a red indicator located just below each button.
- 72 press-on legend tabs.
- Individual 20 amp fused outputs.
- Designed to stack-mount with the WS295 Series Siren amplifiers or Traffic Advisor™ Control Head.
- Includes a universal bail bracket strap mounting kit for over or under dash mounting.
- Weight: 1.75 lbs. (0.8kg).

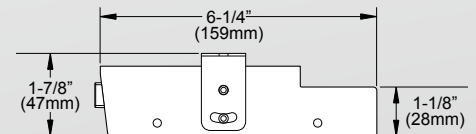

MODEL

PCCS9RW: ...Programmable power control. (Replaces PCCS9R)
