

Model 71011 Series LED Tail Position Light

Whelen Aviation Division is proud to announce the introduction of Model 71011 Series LED Tail Position Lights to its family of aviation safety lighting products.

The 71011 is designed as a high quality, long lasting, modern alternative to incandescent & halogen tail position lights. Also, the 71011 series offers significant technological upgrades over previous products. Utilizing LED (Light Emitting Diode) technology, Whelen is able to provide the following advantages compared to the existing incandescent and halogen light assemblies, to significantly **reduce operating costs**.

FEATURES

- **Lamp Life** - The LED light source has shown conservative lab life results greater than 20,000 hours
- **Reduced Power Consumption** - More efficient than alternative light sources
- **Shock & Vibration Resistant** - No fragile filament
- **Utilizes State-of-the-Art Surface Mount Technology**
- **No EMI or RFI Interference**
- **FAA TSO-C30c TYPE III Approved**
- **Hard Coated Clear Polycarbonate Lens**
- **Unit complies with color requirements per FAR Parts 23, 25, 27 and 29 for Aviation White**
- **Compatible with existing position light mounting & profiles**

SPECIFICATIONS*

Lamp:
LED (Light Emitting Diode)

Voltage:
28 VDC

Input Current:
0.30 Amps

LED Color:
Aviation White

Approx. Life:
20,000 Hours

Weight:
0.20 Lbs.

| MODEL | PART NUMBER | DESCRIPTION |
|---------|---------------|------------------------|
| 7101102 | 01-0771011-02 | VERTICAL MOUNT (28V) |
| 7101103 | 01-0771011-03 | HORIZONTAL MOUNT (28V) |
