PRODUCT SUPERSESSION

▶▶▶ CURRENT: HHS2200

Effective August 2, 2018, the new HHS3200 Series is replacing the original HHS2200 Series. Please consider upgrading using the recommended replacement below.

Whelen's new innovative HHS Series features standard switching and a completely redesigned molded amplifier housing, providing excellent durability. The all-new handheld control head is engineered with LED backlighting for ease of use. The HHS3200 are compatible with low current or high current products, and require lightheads with a built-in flasher.
