

PRODUCT UPDATE

Whelen Engineering now offers Proclera® Silicone Optics for all take-down light options in Liberty™ II and Legacy® Series lightbars.

Proclera Silicone Optics are Whelen's innovative and efficient solution to distorted optical shape and fringe lighting. Silicone provides a higher transmission of light energy and optical power, providing you with the best outcome: less distortion and up to a 3x brighter light output, all while better directing light where it is needed most.

- 100% internal silicone optic technology
- Increased ability to harness LED output and better direct and focus light
- Full-fill Square TIR optic increases optic efficiency compared to a conventional circular TIR
- Internal design placement keeps optics in optimal condition and protects from harsh road conditions

Liberty™ II Series Lightbars

ITS3 - Short 3 LED

ITL3 - Long 3 LED

ITL12 - Long 12 LED

Legacy® Series Lightbars

GBTS - 3 LED

GBTL - 6 LED
