

MODEL 90615

LED ANTI-COLLISION LIGHT

The 90615 is the high performance, long lasting and reliable alternative to existing, outdated anti-collision lights. This solid-state LED anti-collision light offers significant design improvements over previous products while reducing your operating costs!

Whelen Engineering leads the industry in the development of LED technology for Aviation, Law Enforcement, Rescue/EMS and DOT lighting.

FEATURES

- LED lights provide long life service. Conservative lab life results of more than 10,000 hours.
- **DUAL MODE** Independent controls for red and white LED packages.
- No RFI or EMI.
- LEDs are encapsulated for moisture and vibration resistance.
- Produced as a drop-in replacement for Grimes 30-1012-5.
- Unit ships with MS3112E14-5P series connector.
- Units are mounted using existing configuration without altering the aircraft.

SPECIFICATIONS

Model Number 90615
Lamp LED (light emitting diode)
Input Voltage 28 VDC
Power Consumption .0.9A average
LED Color Aviation Red, Aviation White
Approximate Life 10,000 hours
Weight 1.4 pounds
Part Number 01-0790615-00
 01-0790615-01
Flashrate 45 SFPM
