

WHELEN[®]

ENGINEERING COMPANY INC.

51 Winthrop Road,
Chester, Connecticut 06412-0684
Phone: (860) 526-9504

Installation Guide: 600 Series LED Scenelight

Internet: www.whelen.com
Sales e-mail: autosale@whelen.com
Customer Service e-mail: custserv@whelen.com

⚠ WARNING: This product can expose you to chemicals including Methylene Chloride which is known to the State of California to cause cancer, and Bisphenol A, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

Mounting:

IMPORTANT! When selecting a mounting location, keep in mind that there must be a minimum of 2" clearance around the perimeter of the lighthouse and any vehicle components (insulation, etc.). The rear of the lighthouse must have a minimum 1/8" clearance. This increases airflow over the heatsink and helps maintain proper operating temperature.

Caution: Permanent mounting of this product will require drilling. It is absolutely necessary to make sure that no other vehicle components could be damaged by this process. Check both sides of the mounting surface before starting. If damage is likely, select a different mounting location.

1. Mark off the 4 mounting holes and the "cut-out" area as shown in the mounting diagram.
2. Using a 1/4" drill bit, drill the 4 mounting holes then carefully cut and remove the area of the mounting surface indicated. Do not remove the mounting surface where the mounting holes are drilled.
3. Insert the screw grommet flange into the 4 holes drilled in step 2.

4. Route the cable to your power source and refer to "wiring information" for connections and fusing. After testing the lighthouse, position it onto the mounting surface and secure it to the vehicle using the four #6 x 1-3/4" sheet metal screws provided.

WARNING! All customer supplied wires that connect to the positive (+) terminal of the battery must be sized to supply at least 125% of the maximum operating current and FUSED "at the battery" to carry that load. DO NOT USE CIRCUIT BREAKERS WITH THIS PRODUCT!

IMPORTANT! It is the responsibility of the installation technician to make sure that the installation and operation of this product will not interfere with or compromise the operation or efficiency of any vehicle equipment!

IMPORTANT! Before returning the vehicle to active service, visually confirm the proper operation of this product, as well as all vehicle components/equipment.

IMPORTANT WARNING!

CAUTION! DO NOT LOOK DIRECTLY AT THESE LEDS WHILE THEY ARE ON. MOMENTARY BLINDNESS AND/OR EYE DAMAGE COULD RESULT!

1	1	1	7	11-76D258-000	SCREW GROMMET FLANGE
1	1	1	8	11-26A668-000	COVER / HEATSINK 6/700 SCENE LT

PART NO. KEY:
01-066A669-

VOLTAGE
1 = 12V
2 = 24V

CONNECTOR
0 = NONE
1 = AMP
2 = DEUTSCH

This border represents the 2" clearance required around the perimeter of the heatsink.
NO VEHICLE COMPONENTS ARE ALLOWED WITHIN THIS AREA!

NOTE: Proper lens orientation requires the word "TOP" to be at the top of the lens.

PIN HOUSING (AMP)
Position 1 / White (+) VDC
Position 2 / No Connection
Position 3 / Black / Ground or BLK/WHT / Ground (24V)

SOCKET HOUSING (DEUTSCH)
Position A / White (+)DCV
Position B / Sealing Plug
Position C / Black / Ground or BLK/WHT / Ground (24V)

600 Series 12 volt / Specifications
Input Voltage: 12.8 VDC +/- 20%
Input Current: 2 AMPS

600 Series 24 volt / Specifications
Input Voltage: 25.6 VDC +/- 20%
Input Current: 1 AMP
