

Whelen Engineering announces its popular Perimeter Enhancement Lights (PEL) are now available in red and yellow! PEL2s deliver high intensity, downward projected white ground lighting to illuminate the work area around emergency and utility vehicles, improving visibility at nighttime emergency scenes. Their multi-purpose design makes them an ideal solution for a wide variety of vehicle applications.

### Product Features:

- Same mounting dimensions as original PEL model
- White light is projected downward at a 40° angle to illuminate a large area
- Hard-coated lenses
- Fully encapsulated for moisture, vibration, and corrosion resistance
- Available in Black, Chrome, Red, White, and Yellow polycarbonate housing
- Mounts to vertical surfaces and can be mounted inverted
- Molded rubber gasket protects body panels
- Five-year warranty

### Specifications:

**Voltage:** 12/24 VDC

**Amps:** 12 VDC: .65 amps

24 VDC: .375 amps

**Certification:** NFPA 1901 12.10.1.1 (rear ground lighting)

NFPA 1901-1917 13.12.1.2 (underbody ground level)

R10

| Models | Description                                   | List Price |
|--------|---|------------|
| PEL2B  | Perimeter Enhancement Light, Black, 12/24 VDC | \$230.00   |
| PEL2C  | Perimeter Enhancement Light, Chrome, 12/24VDC | \$230.00   |
