

# Tracer™ WeCanX®

## SUPER-LED® LIGHT ARRAY

Engineered to increase vehicle visibility, Tracers now connect over the WeCanX network and offer more customization than ever before. The thoughtful redesign of the popular light arrays provides significant improvements in functionality, configurability, and performance. Though similar in design to its predecessor, the new Tracer uses enhanced optics to provide dynamic lighting output and control. Lightheads are daisy-chained together in lengths of one to six modules, with each module containing four individually controlled segments for contiguous lighting display and expanded configuration to meet a variety of needs. Upgraded lens design and IP67 rating for dust and water resistance improve performance and durability.
