

The new WeCanX 2250 Warning Light Array and Traffic Advisor packs more power into a sleeker design with a wide variety of light configurations to meet your needs. Combining the performance and reliability of our powerful ION™ T-Series™ lightheads with the customization and control of WeCanX, its versatility makes it an ideal lighting solution for a wide range of applications.

WeCanX 2250 is slimmer than our 4500 Series, provides warning options, and allows aerial recognition. Angled end caps create a unique multi-angled light spread, and snap-in assembly allows lightheads to be easily removed for customization and field serviceability. Whelen Command® enables endless functionality configurations and lighthead placements are easily defined within WeCad™.

Prices valid through 1/31/2023

Here’s how to order in WeCad™:

1. Choose the length of your Light Array.
2. Select desired colors of each DUO lighthead.
3. Choose between regular angled end caps or end caps with an aerial recognition light (only one aerial light per array).
4. When selecting an aerial recognition light, choose the appropriate model (right/left corner, 30”-50” length or 50”-80” length).
5. Select desired color of aerial recognition light.
