

Digital Voice Messages

FEATURE UPDATE • MARKET ADVISORY

MA:0069 • 01/2024

Digital Voice Messages (DVMs) are now available for download in English and Spanish and can be added to your vehicle configuration in Whelen Command®.

With over 30 options available, DVMs can be programmed to help officers notify the public of evacuation orders, provide instructions during traffic stops, issue warnings at active scenes, and more.

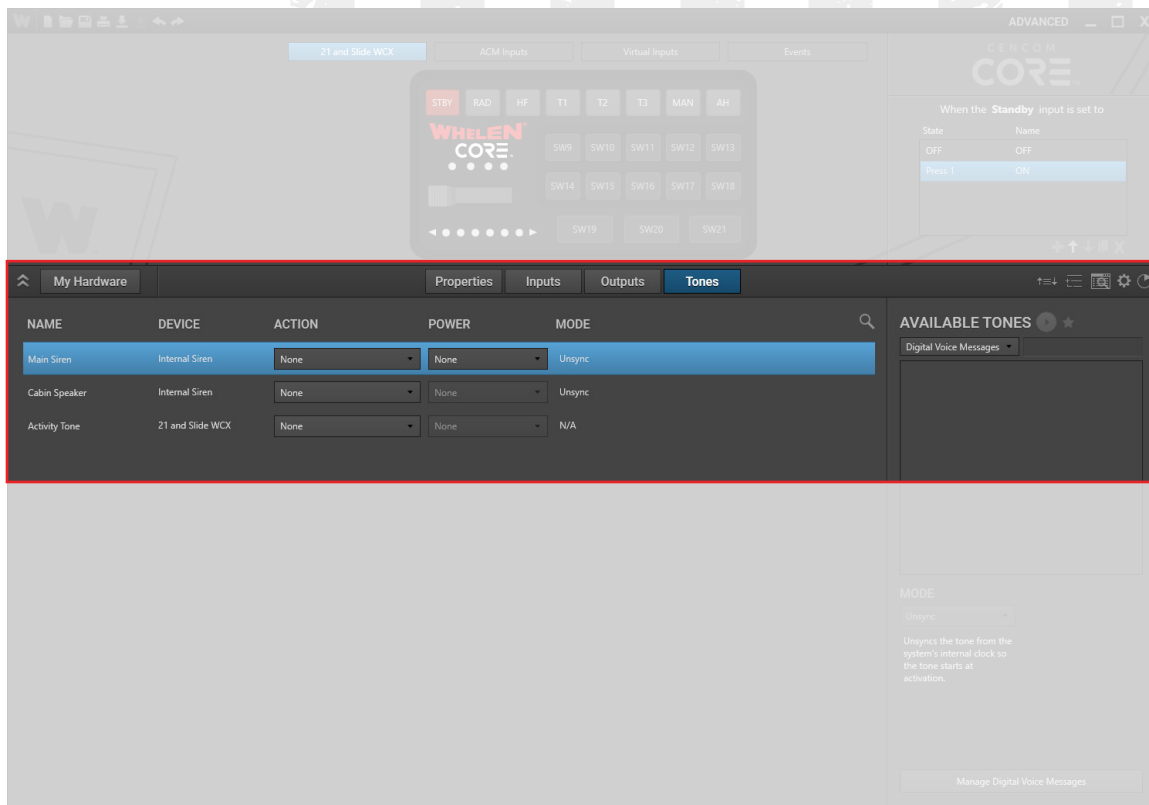

Digital Voice Messages can be easily added to vehicle configuration via the “Manage Digital Voice Messages” window in the Whelen Command software.

Visit www.whelen.com/whelen-command/digital-voice-messages/ to preview and download new DVMs to add to your configuration.

Please contact your Whelen sales representative with any questions.

Scan to preview and download new DVMs to add to your configuration.

Digital Voice Message configuration in Whelen Command
