

Tracer™ WeCanX®

SUPER-LED® LIGHT ARRAY

TRCW5

Engineered to increase vehicle visibility, Tracer Light Arrays now connect over the WeCanX® network and offer more customization than ever before. Though similar in design to its predecessor, the new Tracer uses enhanced optics to provide dynamic lighting output and control.

Lighthoods are daisy-chained together in lengths of one to six modules, with each module containing four individually controlled segments for contiguous lighting display and expanded configuration to meet a variety of needs. Upgraded lens design and IP67 rating for dust and water resistance improve performance and durability over the previous Tracer Light Array.

Tracer WeCanX Light Arrays are configurable in WeCad™.
